DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In line 10, page 1 of the specification, after the "." insert the sentence --This application is a 371 of PCT/JP03/12336 filed on 09/26/2003.--

Allowable Subject Matter

2. Claims 20-38 are allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 20, 22-23, 26, and 32-36 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 6 wherein one end of the second capacitor is connected to a gate of the first MISFET (T1) and a second clock (2VCLKn), having a voltage amplitude larger than that of a sum of the operating voltage and a threshold voltage of the first MISFET (T1) and being a reversed phase to the first clock (CLK) is inputted to the other end thereof in combination with the rest of the limitations of the base claims and any intervening claims. Claims 21, 24, 25, and 27 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 14 wherein one end of the second capacitor is connected to a gate of the first MISFET (T1) and a second clock (2VCLK), having a voltage amplitude larger than that of a sum of the operating voltage

and a threshold voltage of the first MISFET (T1) and having a same phase to the first clock (CLK) is inputted to the other end thereof in combination with the rest of the limitations of the base claims and any intervening claims. Claims 28-29 and 37 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 14 wherein a voltage (2VCLK) having a voltage amplitude larger than that of a sum of the operating voltage and a threshold voltage of the transfer MISFET (T1) is applied to the gate of the transfer MISFET (T1) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 30-31 and 38 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure wherein a voltage (2VCLK) having a voltage amplitude larger than that of a sum of the operating voltage and a threshold voltage of the transfer MISFET is applied to the gate of the transfer MISFET in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
